Whole Plant Solution for TOPIM

Whole plant planning with Central feeding, water and electricity system. Applied to the **automatic production line** for rice cooker. Greatly saved labor and improved efficiency.

Injection Molding Whole Plant Solution for Siku Electronic Technology

Topstar injection molding machine with central feeding, water and electricity, cleanroom. Realize the automation of the entire injection molding plant

SMART Injection Molding Plant Solution for Weihai Metal Technology

Topstar offered IMM with MES, central feeding, water and electricity systems, And robots to realize the automation production and smart management for whole injection molding plant.
